

GotXA Techs · Executive Security Operations Report

Classification: RESTRICTED // SOC INTERNAL | Report ID: GOTXA-REP-20260902-1807

Target Environment:	GotXA Enterprise IT & OT Network	Generated On:	2026-09-02 18:07:02 UTC
Report Type:	EXECUTIVE Summary	SOC Author:	Automated SIEM Engine
Network Scope:	Subnet 172.26.0.0/16 (Corporate & Modbus OT)	Security Status:	● ACTIVE MONITORING

■ Table of Contents

Section	Module / Title	Description & Scope
1.0	Executive Posture & Key Metrics	High-level security score, ingested event volume, and incident velocity.
2.0	Enterprise & OT Asset Inventory	Catalog of active PLCs, web servers, databases, and network clients.
3.0	Threat Telemetry & Security Events	Chronological stream of normalized security events from IT and OT sources.
4.0	High-Priority Alerts & Incident Queue	Active security alarms, MITRE ATT&CK; mappings, and severity classifications.
5.0	SOAR Automated Response Actions	Automated and analyst-triggered containment playbooks and defense audit.
6.0	Identity, Authentication & Session Audit	Corporate portal logins, session security checks, and brute-force tracking.
7.0	NIST CSF Compliance Recommendations	Continuous remediation roadmap aligned with NIST Cybersecurity Framework.

1.0 Executive Security Posture & KPI Summary

The GotXA SIEM/SOAR platform provides continuous visibility across IT enterprise systems and OT industrial automation. The table below highlights real-time operational metrics captured during the evaluation window.

TELEMETRY EVENTS	MONITORED ASSETS	ACTIVE ALERTS	SOAR PLAYBOOKS	SECURITY SCORE
6,059 Events Ingested	4 Active Nodes	0 Open Alarms	3 Executions	98% Optimal Posture

2.0 Enterprise & Industrial OT Asset Inventory

Discovered compute nodes, Modbus TCP programmable logic controllers (PLCs), and web gateways currently connected to `gotxa-net`.

Hostname / Node	Asset Classification	IP Address	Trust State	Last Observed
-----------------	----------------------	------------	-------------	---------------

db-primary	database-server	172.26.0.x (gotxa-net)	TRUSTED	2026-09-02 18:07:00
ot-scada-gateway	web-server	172.26.0.x (gotxa-net)	TRUSTED	2026-09-02 18:07:00
backend-api	server	172.26.0.x (gotxa-net)	TRUSTED	2026-09-02 18:06:59
web-01	web-server	172.26.0.x (gotxa-net)	TRUSTED	2026-09-02 17:05:17

3.0 Threat Telemetry & Security Events Stream

Normalized real-time security events captured by the parallel collector and SCADA telemetry workers.

Timestamp (UTC)	Source Node	Severity	Event Payload / Telemetry Log
2026-09-02 18:07:00	db-primary	INFO	PostgreSQL pool status: 9 active sessions Transaction commits nominal WAL log buffer synced
2026-09-02 18:07:00	ot-scada-gateway	INFO	SCADA Modbus polling cycle complete Event batch verified CPU: 14.2%
2026-09-02 18:06:59	backend-api	INFO	Host Resource Telemetry: CPU 14.2% RAM 28.5% (580.0 MB / 2048.0 MB) Disk Free 19.2 GB
2026-09-02 18:06:59	backend-api	INFO	Host Resource Telemetry: CPU 14.2% RAM 28.5% (580.0 MB / 2048.0 MB) Disk Free 19.2 GB
2026-09-02 18:06:59	backend-api	INFO	Host Resource Telemetry: CPU 14.2% RAM 28.5% (580.0 MB / 2048.0 MB) Disk Free 19.2 GB
2026-09-02 18:06:59	backend-api	INFO	Host Resource Telemetry: CPU 14.2% RAM 28.5% (580.0 MB / 2048.0 MB) Disk Free 19.2 GB
2026-09-02 18:06:55	backend-api	INFO	Host Resource Telemetry: CPU 14.2% RAM 28.5% (580.0 MB / 2048.0 MB) Disk Free 19.2 GB
2026-09-02 18:06:54	db-primary	INFO	PostgreSQL pool status: 9 active sessions Transaction commits nominal WAL log buffer synced
2026-09-02 18:06:54	db-primary	INFO	PostgreSQL pool status: 9 active sessions Transaction commits nominal WAL log buffer synced
2026-09-02 18:06:54	db-primary	INFO	PostgreSQL pool status: 9 active sessions Transaction commits nominal WAL log buffer synced
2026-09-02 18:06:54	ot-scada-gateway	INFO	SCADA Modbus polling cycle complete Event batch verified CPU: 14.2%
2026-09-02 18:06:54	db-primary	INFO	PostgreSQL pool status: 9 active sessions Transaction commits nominal WAL log buffer synced
2026-09-02 18:06:54	ot-scada-gateway	INFO	SCADA Modbus polling cycle complete Event batch verified CPU: 14.2%
2026-09-02 18:06:54	ot-scada-gateway	INFO	SCADA Modbus polling cycle complete Event batch verified CPU: 14.2%
2026-09-02 18:06:54	ot-scada-gateway	INFO	SCADA Modbus polling cycle complete Event batch verified CPU: 14.2%

4.0 High-Priority Alerts & Incident Queue

Correlated security alarms generated by SIEM correlation rules and threshold monitors.

Alert ID	Severity	Source	Title & Detection Rule	Status
ALT-SYS-NOMINAL	INFO	siem-engine	System baseline established — all parameters within nominal thresholds	CLOSED

5.0 SOAR Automated Defense & Response Log

Security Orchestration, Automation, and Response (SOAR) playbooks triggered to contain threats or reset process parameters.

Playbook Name	Target Asset	Status	Mitigation Result & Outcome
SCADA Heater Setpoint Auto-Correction	ot-plc-refinery-1	COMPLETED	Modbus register 0x0001 regulated to 185.0°C baseline
Automated Port Scanner Rate-Limiter	api-gateway	COMPLETED	Nginx limit_req zone applied 10r/s throttle to high-frequency probes
Session Integrity & Brute-Force Lockout Guard	corp-portal	ACTIVE	Continuous monitoring for failed credential sprays active

6.0 NIST CSF Compliance & Strategic Recommendations

Assessment of the current deployment against the NIST Cybersecurity Framework core functions:

NIST Core Function	Implementation Status	Observed Controls & SIEM Capabilities
IDENTIFY (ID)	COMPLIANT (95%)	Automated device discovery catalogs new network nodes and Modbus PLCs upon initial telemetry handshake.
PROTECT (PR)	COMPLIANT (92%)	Reverse proxy TLS termination, rate-limiting, and RBAC authorization protect endpoints from unauthorized tampering.
DETECT (DE)	COMPLIANT (96%)	Parallel log collector and Modbus pollers detect threshold violations, anomalies, and unauthorized port probes in real time.
RESPOND (RS)	COMPLIANT (94%)	Integrated SOAR automated playbooks execute process parameter rollbacks and immediate containment on detected breaches.
RECOVER (RC)	COMPLIANT (90%)	Audit event logging with correlation IDs ensures complete forensic reconstruction and safe state restoration.
